Water Aerobic- This 45-minute classes utilizes the entire shallow end of the pool, and aims to help people with flexibility, cardio, balance and muscle strength. The advantage of this class is the water eliminates the harsh impact on the joints that on-land exercise provides.

Deep H₂O Aerobics- With the use of aqua joggers, individuals can get a complete body work out with very limited impact on the joints. This class focuses on range of motion, flexibility, and working opposing muscle groups. Must be comfortable with water over your head. This class is ideal for those wanting a bigger challenge consider trying some of the exercises without the aqua jogger belt.

Aqua Gym- Aqua gym is a program that utilizes the support of the water paired with resistance and weight training. This 45-minute class is a mix of aerobics training, cross training, strength training, and cardio. This class takes place in shallow and deep water.
